 Utilize your Terminal's full potential.

PROBLEMS with data?

liters of fuel per month	200 000
containers per week	40 000
gate traffic trucks per month	17 500
ships annually	350

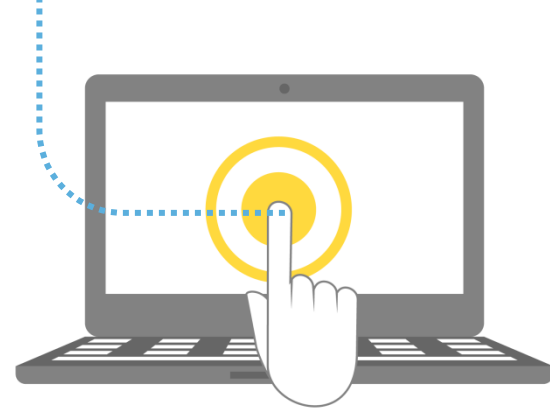

Use your business data 24/7

- 1 [integrated data source | instant access]
- 10 minutes [new report creation]
- within seconds [access & filtering]
- within hours [data-mining on a complex database]

ENTERPRISE PERFORMANCE MANAGEMENT

DRILL-DOWN TO DETAILS

Analyze data at any level with one click. Find root-causes of a problem in no time.

Define new reports, change existing ones or entire dashboards. Do it without need of assistance from your IT department.

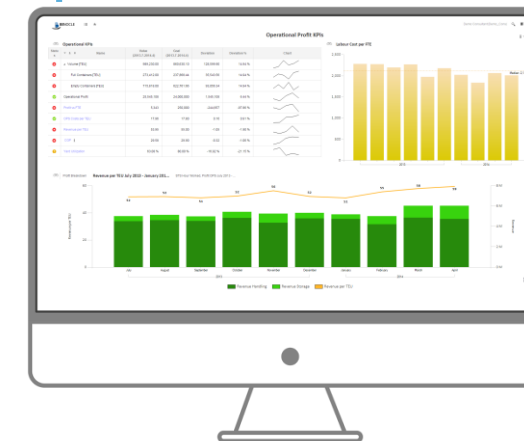

BUDGETING & FORECASTING

Forget multiple Excel file exchange. Easily **manage the budgeting** process.

Fine-tune **financial and operational planning**. Test scenarios, validate strategy on-the-fly and visually present performance outlook.

PERFORMANCE ANALYSIS

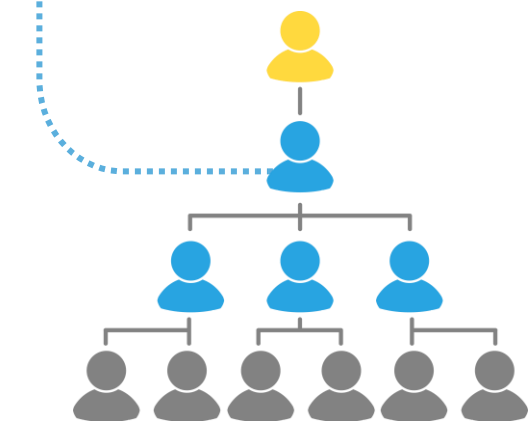

Gain a **complete view of business performance** (sales, costs, inventory, accounts payable, general ledger, etc.).

Check deviations from the plan and find out what causes them.

OPERATIONAL EFFICIENCY

INFORMATION CASCADE

Create lists of people and their access levels to information in the system.

Bilander allows you to define it by rank, function, localization, etc. You can also apply individual settings to a person or group.

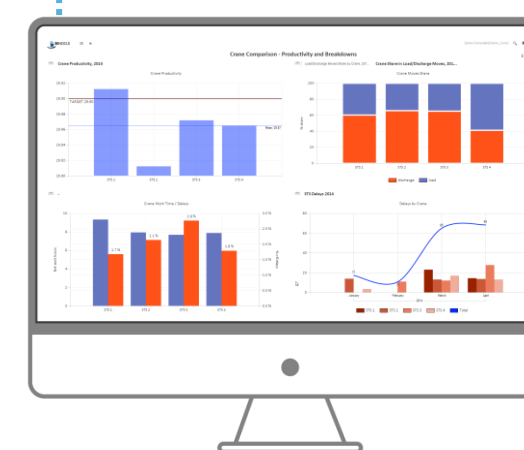

HEAD OFFICE

Monitor the key aspects of your Terminal, such as:

- Enterprise & Strategic Performance Management.
- Financial control, HR.
- Stakeholder reporting.

BERTH & STS

Control and improve berth efficiency with precise monitoring and analysis.

Discover potential and actual problems; find ways to increase productivity.

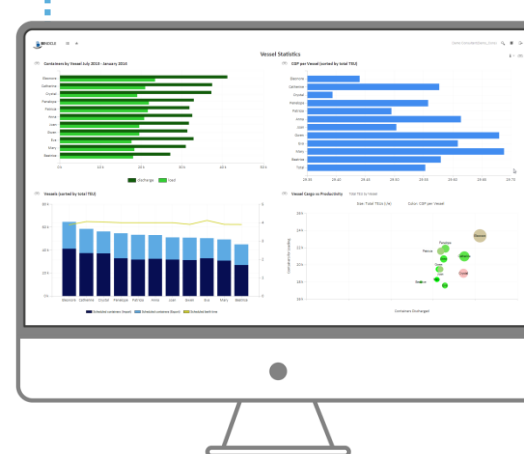

TIME SAVING

Automate **data integration**. Stop wasting countless hours on manual data entry and reporting.

Dedicate it to data analysis that actually brings real **benefits to your business**.

TRANSPORT

Optimize traffic and boost overall Terminal efficiency.

Control situation & spot incidents at a glance.

Each vessel/truck/train visit is automatically summarized and stored in the system.

YARD

Monitor all the yard KPIs on a current basis.

Analyze dwell times, yard usage, spot development opportunities, etc.
