

ENERGY EFFICIENCY

Start saving on utilities. Manage optimum energy use at all locations.

A proven solution

Bilander brings immediate benefits. Our system supports the H&M fashion retail chain and provides up to 30% energy cost savings across the sales network.

LIGHTING

STREETS – are our light sources efficient? Is it time to upgrade the technology?

FACILITIES – are we using resources prudently (e.g. turning the lights off after admission hours)?

DISTRICT HEATING

BUILDING MODERNIZATION – has the new insulation / installation upgrade yielded the expected benefits?

MANAGEMENT - are we using the energy in a rational way (e.g. avoid heating too much on hot days)?

AIR CONDITIONING

EQUIPMENT

LOAD is our machinery turned on unnecessarily?

SERVICE – should we repair certain devices or replace them (with the more efficient ones)?

PUBLIC TRANSPORT

REPORTS 24/7, ANYWHERE

Meet Bilander, a system designed for Business Users. Have your headquarters, regional managers, outlet managers access information around the clock and on any device. Easily check current sales rankings / margin / turnover / dynamics for any store, region, the entire network etc.

ENERGY EFFICIENCY

All data in one spot.

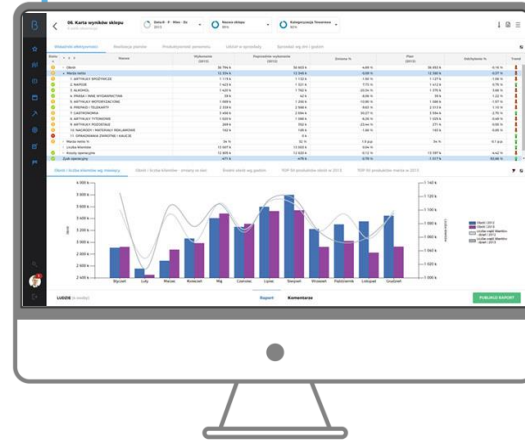

COST CONTROL

Find the causes of deviations from the plan within minutes. Define new reports and shape existing ones the way you want.

Carry out in-depth analyses and data mining at any given time.

REPORTS AND ANALYSES

Observe the power consumption of facilities, individual areas or single devices.

Avoid energy waste. Use Bilander for the benefit of the entire organization.

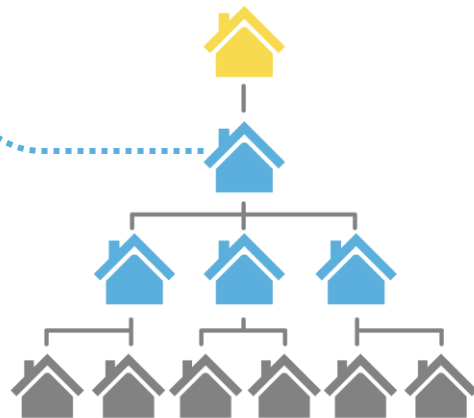

COST FORECASTS

Plan energy consumption and check what influences it.

Use advanced forecasting models to support accurate planning.

ENERGY MANAGEMENT

Effortlessly manage power consumption at all locations.

Have your Team observe current energy usage and propose / implement new ways to reduce it

EXPENDITURE CONTROL

Reduce the cost of facilities management & maintenance while keeping the comfort of users intact.

Compare the amounts on invoices with actual usage. Compare the planned and current consumption

DATA AGGREGATION

Enrich analyses with any data (eg. weather, traffic). Bilander is designed to be open for expansion.

It's easily adaptable and will fit any stage of technological advancement across your facilities.

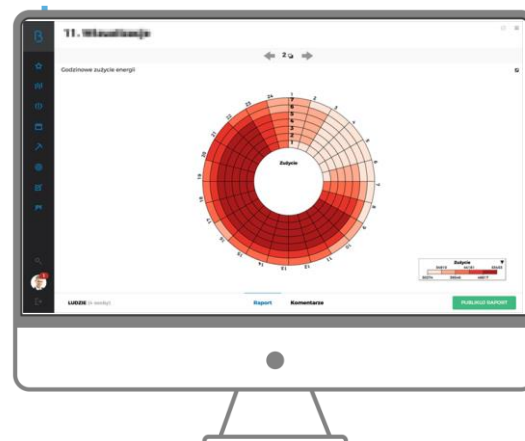

TIME SAVINGS

Increase information flow with reports accessible 24/7.

Save and share any report in multiple formats (PDF, Power Point, Excel, PNG).

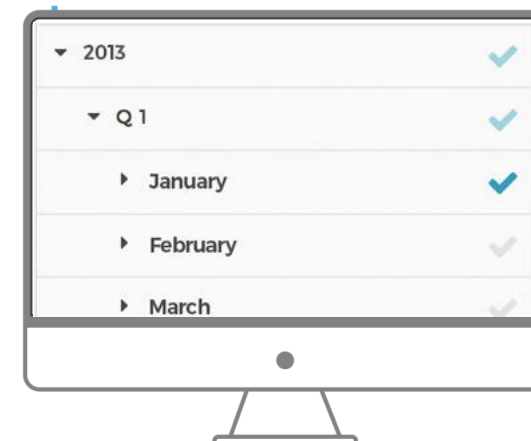

EQUIPMENT EFFICIENCY

Know operation cost of any piece of equipment. Monitor what breaks down the most frequently and where.

Avoid unnecessary costs. Bilander helps you make informed decisions to repair or replace equipment

FLEXIBLE REPORTING

Customize reports to current needs.

Watch the data in a new light.

Produce reports in any time scale thanks to easy-to-use filters.
